

Flat roof system

Ubbink FRS60 mounting system for flat roofs:

For easy and quick installation on the flat roof, there is the Ubbink FRS60 flat roof mount. This plastic bucket is placed without the need to break through the roof covering. The bins are ballasted and the solar panels are mounted on them. This is covered by a 10-year manufacturer's warranty.

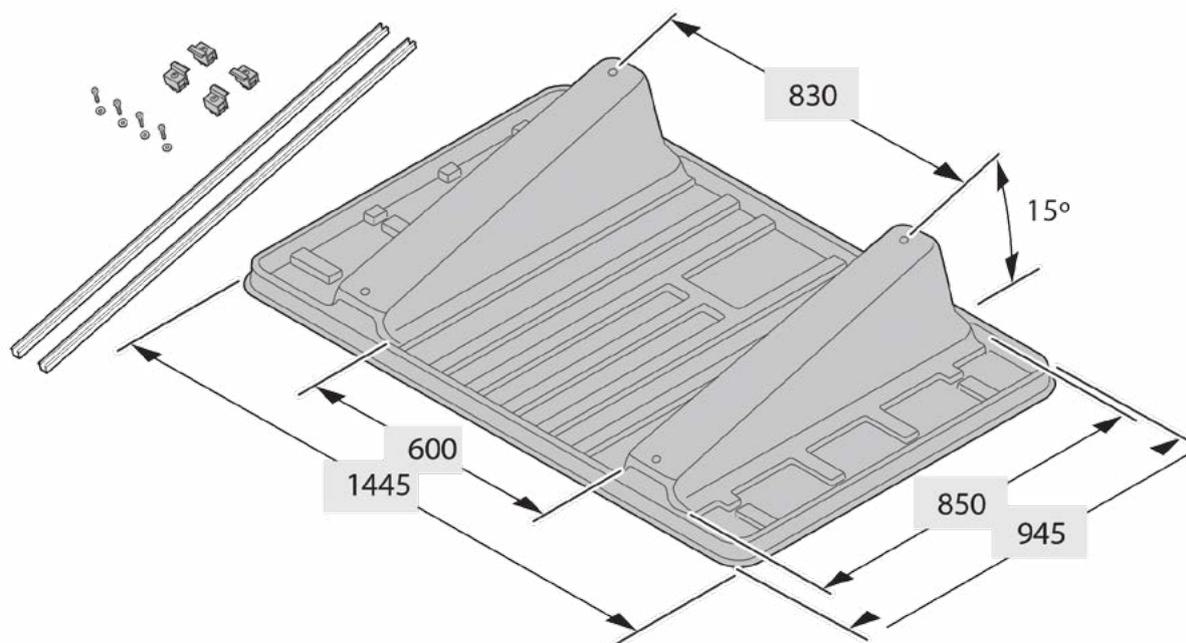

This unique aerodynamic design can withstand high wind speeds with minimal ballast weight. The Ubbink FRS60 brackets are made of high quality plastic. The well thought out Ubbink FRS60 system can be used for the installation of almost all types of solar panels.

Characteristics:

- Plastic module including fastening system
- QTY 40 pcs.
