

KLE-FIELD

The inexpensive unit mounting system for open areas:

- Stability and high duration
- Perfectly matched components
- High degree of corrosion resistance (100% aluminium)
- Fast and cost-effective project planning
- Complete structural analysis
- Fast assembly (partly pre-assembled)

Open fields are ideally suited for the application of PV systems. In addition to many square metres, they also offer plenty of space to place the installations in the most favourable position in relation to the sun. The KLE-FIELD "Open Field" is a modular system with universally applicable high-quality components (aluminium / high-grade steel). It allows you to mount any type of module in practically any situation.
